Measurement and Geometry

O'clock Times

Aim

- I can use a clock to tell the time to the hour.

Success Criteria

- I can describe a clock face.
- I can tell the time to the hour.

What's the Time, Mr Wolf?

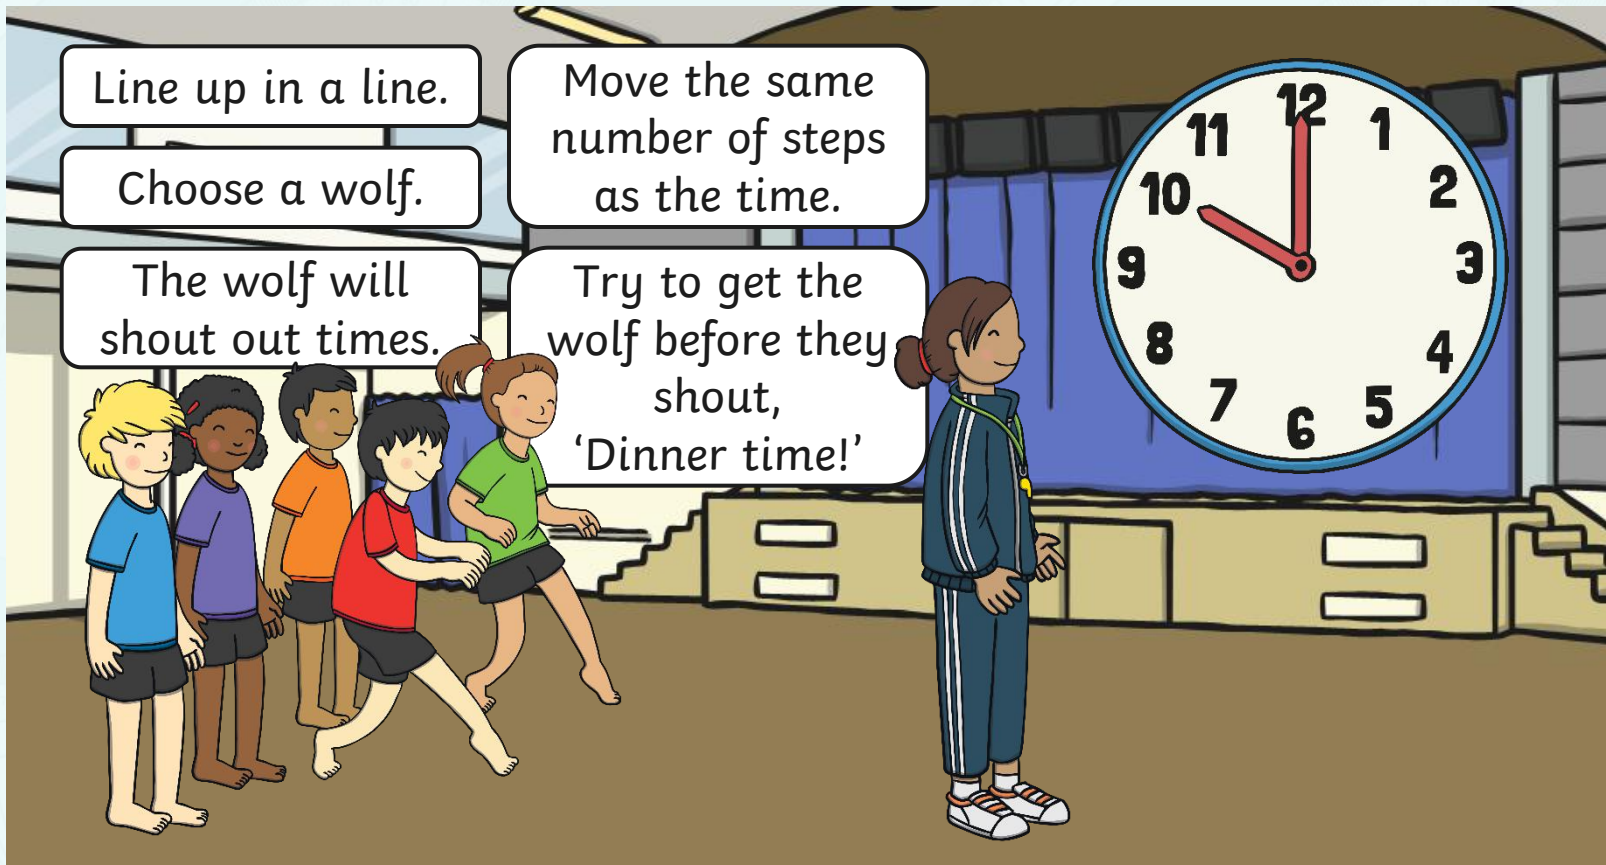

Line up in a line.

Choose a wolf.

The wolf will shout out times.

Move the same number of steps as the time.

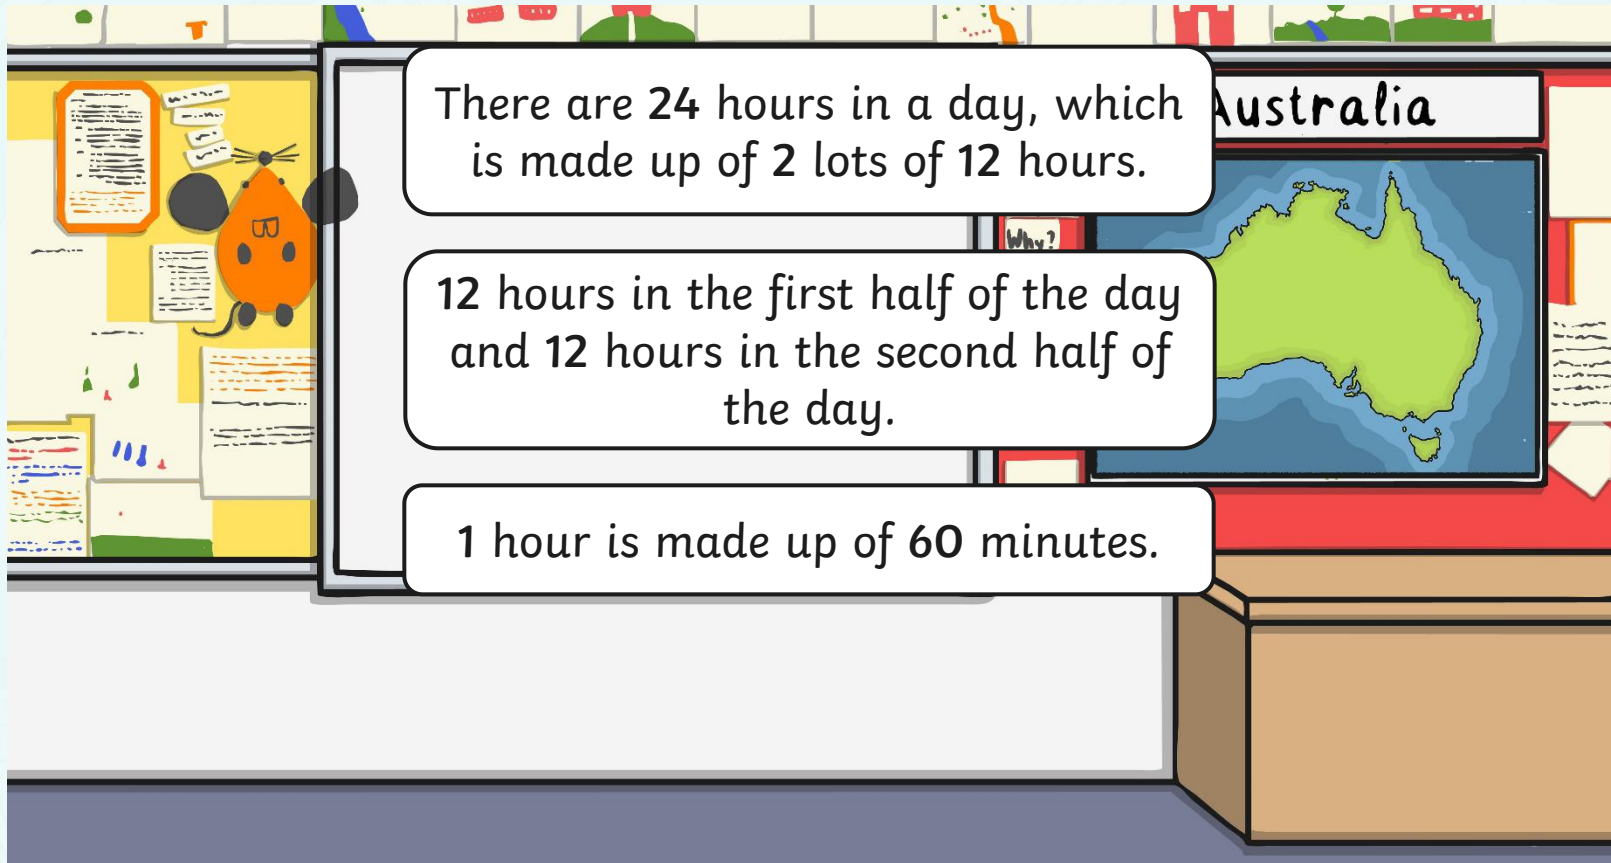

Try to get the wolf before they shout, 'Dinner time!'

Clocks

Time is measured in years, months, weeks, days, hours, minutes and seconds. We use clocks to measure time.

Clocks

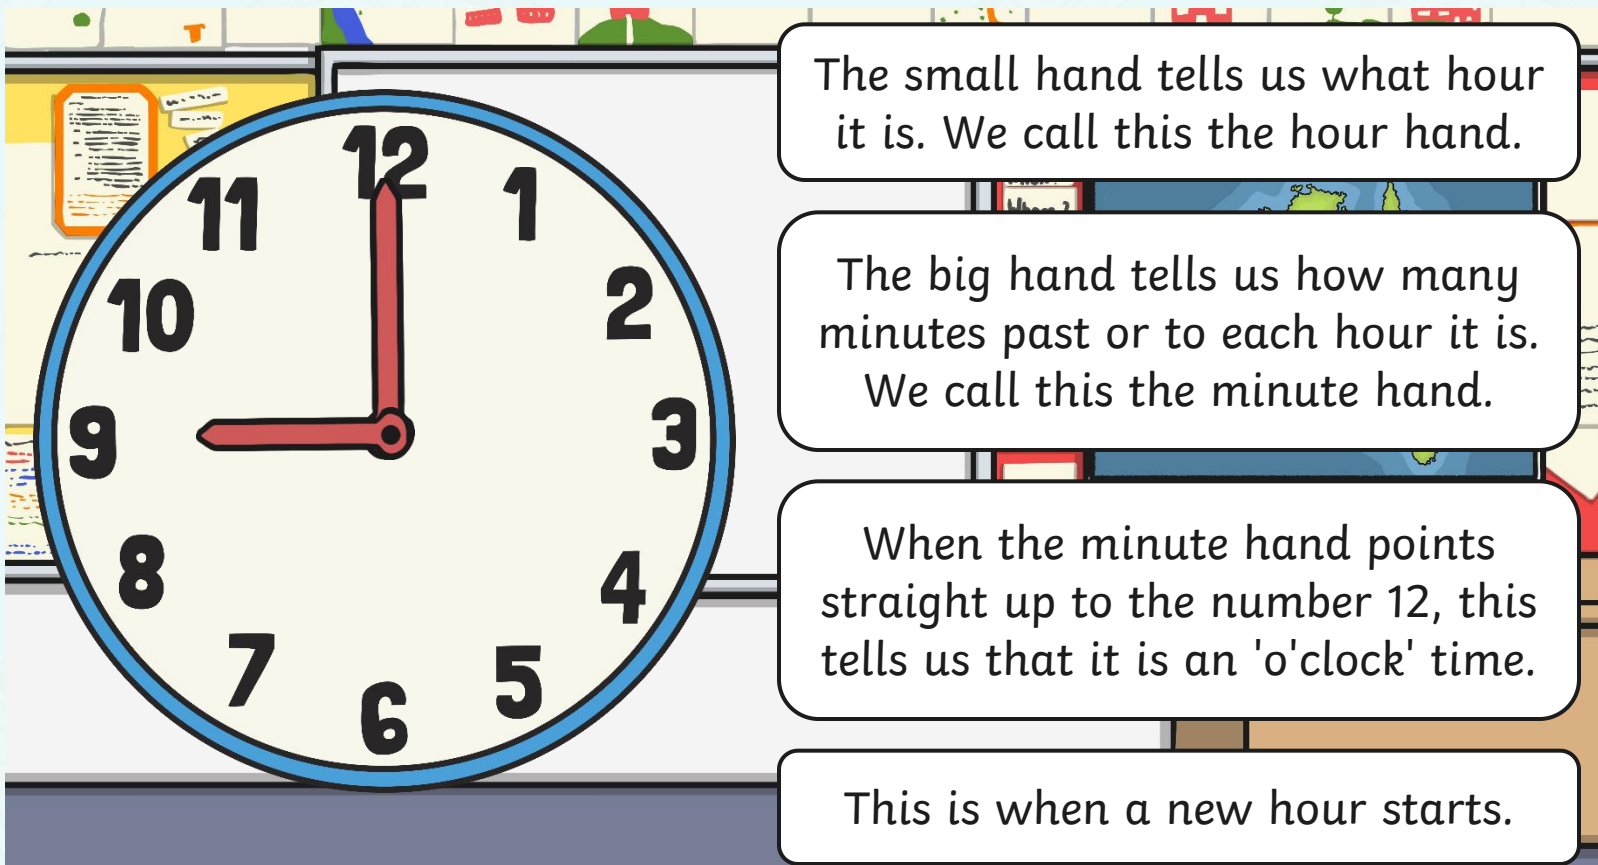

We use clocks to tell us the time. What are these parts of the clock called?

Clocks

We use clocks to tell us the time.

The small hand tells us what hour it is. We call this the hour hand.

The big hand tells us how many minutes past or to each hour it is. We call this the minute hand.

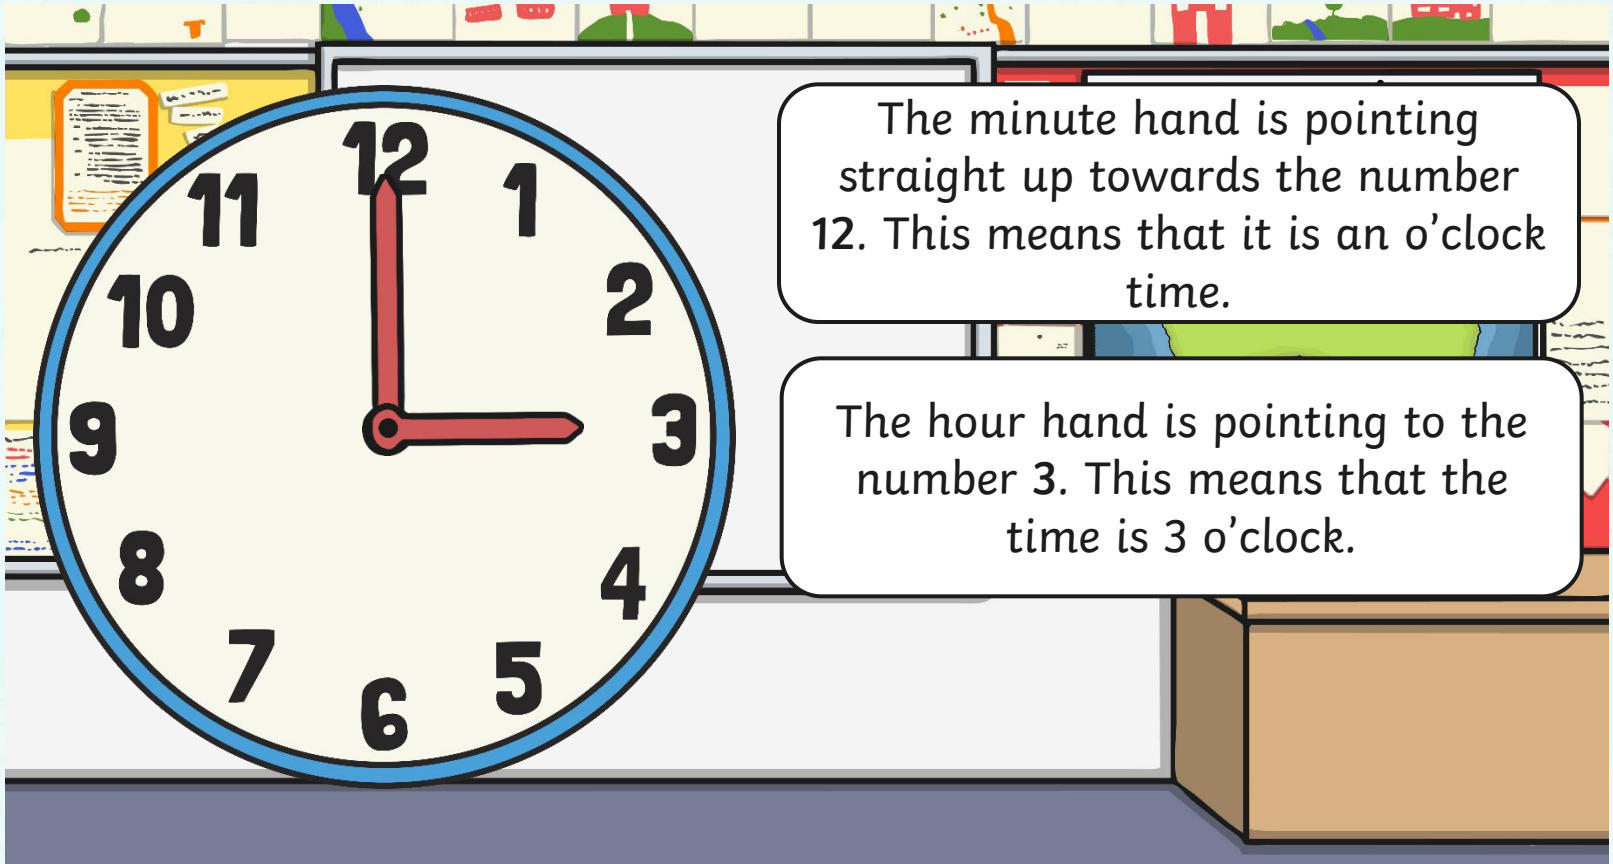

When the minute hand points straight up to the number 12, this tells us that it is an 'o'clock' time.

This is when a new hour starts.

Clocks

We use clocks to tell us the time.

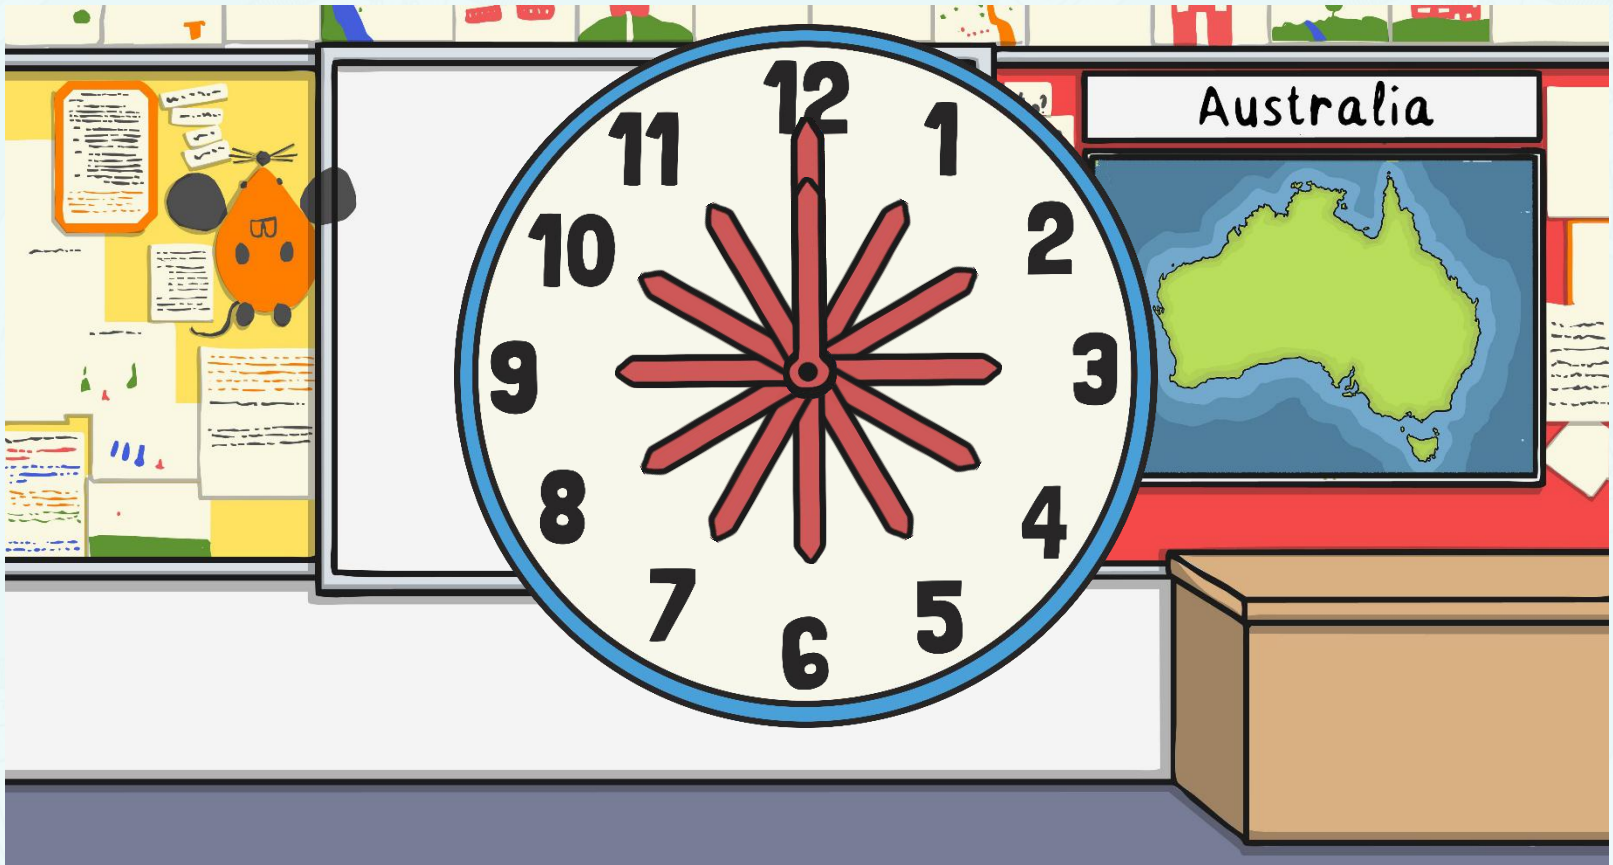

The minute hand is pointing straight up towards the number 12. This means that it is an o'clock time.

The hour hand is pointing to the number 3. This means that the time is 3 o'clock.

Clocks

Let's say the time on the clock together.

What Time Is It?

Click the correct time.

A colorful illustration of a classroom. In the center is a large round clock with a blue border and black numbers from 1 to 12. The hour hand is pointing to 12 and the minute hand is pointing to 2. To the right of the clock is a map of Australia on a screen, with the word "Australia" written above it. To the left of the clock is a bulletin board with a paper airplane and other papers. In the foreground, there is a brown desk. Below the clock and desk are three white buttons with black text: "2 o'clock", "4 o'clock", and "12 o'clock".

Clock Faces

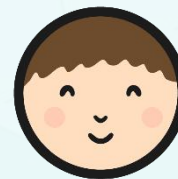

Clock Face Template

You will need:
Scissors
A split pin

Cut out the clock face and the hands.
Stick the numbers on in the correct place.
Attach your hands with a split pin.
