

Welcome to our Virtual School trip.

This week we are going to explore one of the world's largest continents – Asia! And we are lucky enough to see one of the Seven Wonders of the World...the Great Wall of China! This week, you will explore the wall and see what is like to stand on top of one of the greatest standing manmade structures ever built! This tour will allow you to see the wall from three distinct points, click the arrows to rotate your view, and the 'double triangle' to change the viewpoint completely.

We would like you to tell us:

How do you think this wall was built?

Who do you think built it?

What materials do you need to build this wall? Is it important for these to be strong?

Can you create your own 'great wall' using your toys from around the house? Try to use Lego or junk modelling!

Tips for the grown ups-

You can make the images full screen for the children to be able to explore better.
