

Welcome to our Virtual School trip.

This week we would like you to visit Melbourne Zoo. At the zoo you will be able to watch a range of different animals through their webcams. As I am writing this I am currently watching the zebras! There is information about when to see feeding times and you can find out the animal's names and how old they are. Sometimes you have to be really good investigators and spot them hiding.

We would like you to tell us:

Which animal you enjoyed watching the most?

What were they doing when you saw them?

What did you notice about their enclosure?

Can you draw/paint/make us your favourite animal?

We hope you have fun on your first virtual school trip! We can't wait to hear all about it.

<https://www.zoo.org.au/animals-at-home/>

When you open the page, you will see zoo keeper talks, if you scroll down you will find the live animal cams.

Tips for the grown-ups:

You can use the play bar to select a good point to watch them, sometimes with the time difference it could be they are asleep or just not in view.

For excitement, it's quite nice to press play when there is nothing in view and within a few seconds the animal appears 😊
