

Welcome to our Virtual School trip.

This week we would like you to visit the Aquarium! This week, you might get to spot some different animals that can only be found in the ocean. We are very lucky to have such close access to sea lions, otters, jellyfish and even piranhas! My personal favourite is the sea lion. When you click on the link, simply click on the webcam you would like to watch! Make sure you look really closely, as some of these animals can be quite shy.

We would like you to tell us:

Some of the differences you can spot between the animals (Do some have flippers? Do some have hair?)

What you saw the animals doing.

What ocean animals you would like to swim with, and why.

Can you draw/paint/make us your favourite sea creature in their natural habitat?

<https://www.georgiaaquarium.org/webcam/southern-sea-otter-webcam/>

When you open the page, you will see a number of options for 'live webcams' for the different enclosures.

Tips for the grown-ups:

Some of the better animals are the otters or sea lions, they certainly seemed to be the most active when I checked out the tour!
