

What were your hobbies when you were a child?

How did you become an astronaut?

What did you do before you were an astronaut?

What is your family like?

How did you travel into space?

What was your favourite thing about being in space?

I went to medical school and learnt how to be a doctor. I worked as a doctor all around the world.

My family is made up of my mother, father, brother and sister. They always encouraged me to learn new things.

I travelled to space on board a space shuttle called the Endeavour.

I loved looking out of the window at all the stars.

I worked very hard and learned a lot about science. I applied to NASA to join their astronaut training programme.

I loved reading books in the library, dancing and learning about science.
