

## Science Week 3

This week in science, we thought that it would be a fantastic idea to learn all about rainbows!

- 1) Read through the PowerPoint.  
Talk to your adult about what you have read. Adults can ask you questions too!
- 2) Watch the video that shows you how to create your own rainbow at home!

- 3) Why don't you have a go at one of the experiments? You can choose the slime experiment or to grow your own rainbow. Perhaps try the rainbow bubble challenge. What do you notice when you look at the bubbles?
- 4) See if you can you create a mind map to explain everything you have learnt about rainbows. Perhaps you can draw a rainbow in the middle of the paper and share your facts around the it. Remember your beautiful Kings Court font and presentation (make sure you are using a ruler!)

## Feeling Creative?

We have included some lovely templates of rainbows that you can use as inspiration for our King's Courts NHS Nightingale Gallery and to thank our key workers. Don't forget to email your beautiful, colourful picture to be uploaded into our special gallery!

## Mindfulness Activity:

Why not have a go at singing the rainbow song. This is a great breathing exercise. Imagine that you are drawing the colours of the rainbow in the air as you sing along!
