

## Do you want to build a number line? (1+ children)

**Equipment needed**

If drawn...

- Chalk
- Number cards (1 - 20)

If shown...

- Rope or string

**Instructions**

1. Show or draw a blank number line from 0 - 10 on the playground.
2. Pick a number card and position yourself on the number line where you think the number should go. Explain how you know.

5 is halfway along the number line and 4 is 1 less than 5

0

4

10

3. Repeat for other numbers.

**Let's investigate further...**

- What will change if the number line is from 0 - 20? Which number will be halfway? Where will 5 and 15 be? Where will \_\_\_ be?
- Can two different number cards be placed on the same position on the number line? Why or why not?
